PROFESSIONAL SUMMARY

UI/UX Designer with 3+ years delivering enterprise and government-scale products, with hands-on manual testing experience. Specialized in design systems, multilingual and RTL interfaces, and end-to-end UX from research to developer handoff. Skilled in test case execution, functional, UI and regression testing, and defect tracking. Strong Figma expertise focused on scalable, production-ready design.

SKILLS SUMMARY

Skills : UI & UX Design, Wireframing, Prototyping, Usability Testing, User Research, Visual Design, High-Fidelity UI, Component Libraries, UI Audits, Multilingual & RTL UX, Developer Handoff

QA & Testing : Manual Testing, Test Cases, Functional, UI & Regression Testing, Defect Logging, SDLC/STLC

Tools : Figma (Auto-layout, Variants, Variables), Sketch, Adobe.

Soft Skills : Empathy ,Critical Thinking Communication & Collaboration ,Time Management & Project Management

WORK EXPERIENCE

UI/UX Designer & Manual Tester | TCS Jul 2022 – Present

- Develop wireframes, interactive prototypes, and high-fidelity mockups to communicate design concepts.
- Conduct user research, create personas, and map user journeys with PMs and stakeholders.
- Write and execute manual test cases (functional, UI, regression); log and track defects to closure.
- Run UI audits and cross-browser checks to verify builds match approved designs.

PROJECTS

Design Support Engineer & UI Designer | G20 India Project

- Developed and maintained a robust Design System in Figma, creating reusable variants and components that ensured brand consistency across multiple app screens.
- Designed multilingual and RTL-compatible interfaces for an international user base.
- Ensured pixel-perfect alignment between Figma designs and production builds.
- Acted as the bridge between design and engineering, conducting UI audits and manual verification testing – logging visual and functional defects to ensure the live build matched approved Figma designs.

UI/UX Team Member | SHV Energy Project

- Leveraged Figma's advanced features (Auto-layout, Variants, and Variables) to build a scalable component library, reducing design turnaround time by 40% for a lean 2-person team.
- Translated wireframes into high-fidelity prototypes to validate complex workflows early.
- Delivered detailed design documentation to support accurate engineering implementation.

UI/UX Designer (Independent Project) | Kashmiri Essence

- "Designed a seamless 'browse-to-buy' journey that makes shopping for authentic Kashmiri products effortless and intuitive."

EDUCATION

Vasavi College of Engineering

June 2018 – June 2022

Hyderabad India

Bachelor of Computer Science and Engineering : CGPA 7.0

CERTIFICATES

- Learn Figma UI/UX Essential Training (Udemy)
- The 90 Minute UX Audit + UI Redesign (Udemy)
